## TESTING TOOL

Electrical Testing is Essential to Enver Safe Operating Standards for any Establishment or Organisation that uses of Electricity.

Various Government and Agency have Developed Stringent Requirement for Electrical Equipment Like Transformer, Circuit Breaker, Cable Current Transformer, Realy, Earthing, Auxiliary Realy.

- Most Organisation it is Mandatory for a Perfect to Confirm Electrical & Safety Standards.
- To Confirm to such Standards that Equipment Much Pass Safety Test Such as High - Voltage test (Also Know as Di-Electric Voltage-withstand test or hipot test), Insulation Resistance Test, Ground (Earth) Bond and Ground Continuity Test and Leakage Current Test.
- Also for Transformers Oil Filtration & BDV Test Report. Oil is Effcient Coolant with high Flash point and High Dielectric Strength The Insulation Properties can Change due to Oxidation, Dust Partical and Water Adsoption.
- Those all test are Described in Indian Standard Such as IS-6875, IS-4004
- For, Equipment & Human Safety We are Stricly Follow to that Standard Procedure.
